FEATURES

The Bose Videobar VB1 is an all-in-one USB conferencing device that brings premium audio and video to small meeting areas — from huddle spaces to medium-sized rooms. Be seen clearly. Be heard and understood fully.

Six beam-steering microphones automatically focus on voices in the room and reject noise.

A 4K ultra-HD camera with autoframing delivers crystal-clear video, helping remote participants feel like they're in the room.

Proprietary Bose sound supports multimedia presentations, plays Bluetooth® audio, and ensures voices on the call sound natural.

Single-cable connectivity means there's no need for separate audio and video cables at the table, reducing clutter.

Whether it's a quick morning check-in or a full-afternoon workshop, the Bose Videobar VB1 helps you huddle up, see more, hear more, and work better.

- Deliver consistent, premium performance across a range of solutions to make interactions more natural, make meetings more productive, and help everyone feel more connected and engaged
- Offer a simplified conferencing experience with products that are easier to operate, require less troubleshooting, and reliably facilitate clear communication
- Simplify huddle spaces with all-in-one solutions like the Bose Videobar VB1, a premium conferencing device perfect for huddle areas and small meeting rooms
- Help remote workers feel more engaged with desktop and mobile conferencing products like Bose Noise Canceling Headphones 700 UC that make working in open office spaces productive and enjoyable, switching easily between conversation, voice/video calls, and music.
- Design fully integrated meeting rooms using products like ControlSpace EX processors, ControlSpace EX Dante endpoints, EdgeMax loudspeakers, and ControlSpace Designer software
- Bring clarity and intelligibility to large meeting rooms with best-in-class echo cancelling and innovative loudspeakers, so remote meeting participants can hear and understand better
- Integrate with popular unified communications platforms such as Microsoft Teams, Google Meet, Zoom, and more to offer enhanced video and audio performance
- Build trust with end-users by offering easy-to-operate conferencing solutions from a globally respected audio company that they already know and recognize as a premium brand
